UFO Wave Continues Over England

Posted by Duke de Richleau on June 29, 19102 at 11:40:21:

The recent UFO incidents over the British community of Bedhampton, Havant yielded another surprising development, Sunday, June 23, 2002, when a huge dark saucer-shaped UFO appeared in broad daylight. The craft was flying at low altitude demonstrating stunningly advanced technology. The event was witnessed by Anthony Woods, the local skywatcher and experimenter who has been, for many months, documenting the unprecedented UFO activity over this small, quiet British community. A number of other reliable witnesses also observed the saucer make its low pass over Bedhampton.....

"What is jealousy ..??"

Jun-10-02, 02:14 PM (GMT)

I've been told that jealousy is insecurity in a person. Yet, I've met people that appear to be very secure and yet are jealous. I know I'm a jealous person. But it depends on the situation. Especially if it deals with my husband. For example, if he keeps referring to a woman @ work or at church, etc.? It makes me wonder what is "actually" going on ..

In my past relationship, I was cheated on .. so I guess that too is the reason why I can be jealous .. though, come to think of it .. one thing doesn't have to do with the other .. since being cheated on means lack of trust .. ??

Anyways, inputs appreciated ..

how old is old?

How old is Grandpa?

Stay with this - the answer is at the end - it will blow you away.

One evening a grandson was talking to his grandfather about current events. The grandson asked his grandfather what he thought about the shootings at schools, the computer age, and just things in general.

The granddad replied, "Well, let me think a minute, I was born, before television, penicillin, polio shots, frozen foods, Xerox, contact lenses, Frisbees and the pill.

My diet :

Posted by Wendy on 2/23/2002, 10:54 am

I decided to finally do something about my weight. Last May, I joined ediets and was doing marvelously until we went on vacation and I had to deal with my brother in law. I know that sounds strange, but he zapped all the will power I had away from me and I gave up. I started eating like a pig again, and sure enough, all that weight came right back.

I didn't want to go back to ediets again because I was ashamed that I quit using their program. I didn't want to be one of these people who goes back and forth to weight watchers, blah blah... SO, when I saw that I could earn 750 points through MY POINTS for giving dietsmart a try, I decided to go ahead and give it a shot. (www.dietsmart.com) I paid \$45.00 for 3 months. Believe me when I say, it is truly worth it. Yes, I am following a specific plan, but it is teaching me how to make my OWN choices in meal planning. I don't feel deprived at all. I am eating real food. For example, this morning for breakfast, I had an 8 ounce fat free (or low fat) yogurt,(which I adore)a low fat poptart (hell, life is good !) an ounce of cheese (oh yeah, baby !) and coffee.

World War 3

Posted by Jim on February 12, 19102 at 14:32:24:

World War 3 is being fought as we speak. We know of and describe war similar to ones fought in WW1 and WW2. This time the war is being fought differently. The devil disguised the war and is currently fighting WW3 under the guise of terrorism, fear, manipulation and control.

The Antichrist is Bush. Blair is his right hand. Together, they are living our their secret agendas and WW3.

Going blind and deaf!

Posted by Jennifer on 1/23/2002, 3:43 am

I adopted a mini poodle a year ago, unfortunately her hearing and sight is worsening everyday. GiGi hears a bark real well and gets scared to death, then she bolts and runs into stuff. Can anyone give me some suggestions? I hate to say it, but I wish she couldn't hear anything, just so she won't get so scared when my toy poodle barks at a imaginary noise.

"What's the matter with me???"

MandyC21 04:31 PM (GMT)

My husband and I brought our son up to the ER because he has had high fevers for the past 6 days. Anyway, we get there and there is this blonde bimbo-looking thing at the desk and automatically I get all paranoid and I just wanted to turn around and leave, but I was worried about my son at the same time. Anyway, we are waiting in the waiting room and I keep my eye on my hubby's eyes and sure enough when the bimbo is in view he will not look at me but I can see him sneaking peeks in her direction. I feel so terrible to be worrying what he's looking at when we are there to see what's going on with our child. And then we get called into the ER and as we are walking (him behind of course) I look back to see him looking at her, of course he denies it but he was looking to the left where the desk is and we are walking straight. Anyway, when the nurse gets us situated in the room and we are waitign for the doc, I called him on it and he starts insulting me saying I'm nuts! I asked why he has to look, he says he's not checking her out, just looking.

Day 07 - Breakfast Cereal

Posted by scott V VS B on 12/8/2001, 12:32:49

I used to eat breakfast cereals all the time, I loved Golden Grahams and clusters. But for some reason ever since I joined the Navy, I cannot seem to operate without a breakfast a little more substantial than cereal. Although I thought of one day marketing a cereal called 'Surreal Cereal' which I think could be a Marketing Specialist's wet dream. For some reason now I cannot eat Breakfast Cereals. I think that the child in me that ate Frosted Flakes and Frankenberry died when I joined the Navy, now if I even have milk in the morning I fart all day long. I remember in 'A' School people would get mad at me in class 'Dammit Robbins! What did I tell you about eating cereal in the morning?!?' Some people mentioned that I might be lactose intolerant. But I wonder, can you just develop Lactose Intolerance? I always thought that lactose intolerance was one of those things you can't pick up from drinking after someone else. 'Oh no! Don't eat my fries! I'm lactose intolerant!' If I wasn't a virgin in 'A' school I would have thought that maybe lactose intolerance was an STD that I caught from one of my numerous sexual partners, hell! Seven right now I could make 2 phone calls and find out who gave me Lactose Intolerance. But no, I cannot eat cereal anymore. I don't like farting all day, and besides, a good set of fluorescent scrambled eggs and dry toast with frozen butter, and lard-soaked hash browns like you would find in a standard Navy Galley always sound better when you first wake up. I can look back and appreciate that I once loved Clusters cereal, but the goddamned squirrels would always hunt me down, I #####ing hate those squirrels, around every corner, waiting to pounce with their bushy tails and throaty bark. You're Not getting my clusters you #####ing squirrel!!!

The Bush presidency

Dave~A~B - Tuesday, 12/04/01, 3:32:18pm

Is this the World War II board? Yes, I do repeat that line very often. Because it points out the ridiculous nature of President Bush's war against evil-doers. You cannot end terrorism by violence. Bombing Afghanistan into dust and killing all of the Taliban (even OBL if they can find him) will not end terrorism. But this is President Bush's stated goal for his war, yes?

Safety in the skies

Sprchjjeep - Tuesday, 11/13/01, 5:58:57am

Plane accidents happen people, just like car accidents. Last I checked the Dominican Republic was not on Bin Ladin's hate list. The plane was going to the Dominican Republic and killed mostly people from there. Bin laden would be dissappointed with his Al Queda if this was a terrist attack. It was an ACCIDENT and nothing more and sorry for the people who died.

Morgan II - Tuesday, 11/13/01, 6:08:10am

It was not an accident, it was sheer bloody minded incompetance. You dont send a plane up and its engine falls off unless someone somewhere is not doing his job. This isnt an engine failing or some electrical problem: The thing FELL OFF! They stuck on with double sided sticky tape now??

Inside the mind of scott and internet dating

Posted by scott on 10/27/2001, 15:56:41

Some of you have mentioned that you think i am too picky, and maybe i am, but i really dont think so. And since i did have some success with internet dating (I met Leslie through Excite Classifieds) I decided to give it another shot on a different free service, Dreammates.com

And today I got a response, and I will not reply to it and I am going to explain why, I will not even show you the picture of this woman, just reference her ad, and explain why I sometimes hate internet dating. I hate not responding to people who write me because I have standards, but everyone knows that deep down, i am too ###ing nice and trusting for my own good...i dont want to hurt anyone's feelings. Better to not say anything at all...her ad text my comments in italics

Activities that they enjoy

Hiking, Swimming, Walking, Weight lifting

by the picture included in the ad, you can very easily tell that she does not do any of this stuff...except maybe weight lifting, if you count getting out of bed. SO, if she says she does these things, but it is obvious she does not...what did she just do? That's right...LIE!

Really?! Where'd you dig up that tidbit? Oooh man, I'm circling November... uh... whenever Monsters, Inc. is going to be released to the theaters on my calendar. Monsters, Inc. is coming out on November 2nd. I can't wait for that movie to come out...it looks too cute! =)

Not sure anyone else will, though. Looks like Star Wars has lost most of its fans after the Jar Jar debacle. =(

I fail to think so. I think no matter what fans may think of Jar Jar they will always be fans of the movies. They'll still be around once the movie comes out...u'll see!

Genetically Engineered Sunflower Seeds!

From: Gen. Hiram P. Gooberman Date: 09/21/01 Time: 19:36

The Amish have done it again! As we know they are both masters of genetic engineering and farming. Millions of americans are addicted to chewing sunflower seeds, and the Amish have used that to their advantage. Research shows that wild sunflowers lack a chemical that cultivated sunflowers have. Dubbed "Agent X", this chemical attacks a certain part of the brain, creating an intesive craving for the salty nutty flavored snacks. This was done by the Amish in order to create a demand for sunflower seeds, and to make them socially acceptable.
